

Durable, smooth operation and lockable:  
The DIRAK slam latch for sliding doors

## 01 Requirements

“Locking systems for sliding doors must meet several requirements like durability, smooth operation and convenience. Our challenge was to match these attributes precisely and to design the latch so that it is visually appealing as well as lockable.

Our solution: slam latch for sliding doors in different versions. With or without lock, our latches meet the most exacting standards.

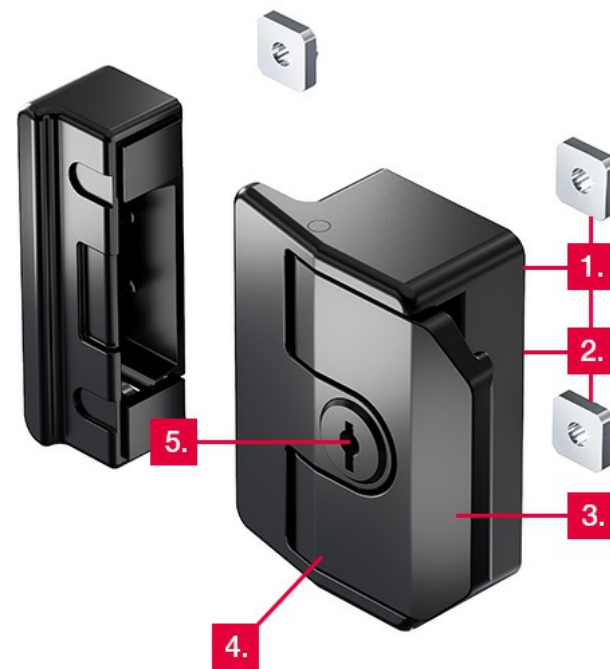

Paula Pinto, Key Business Management

## 02 Product Benefits

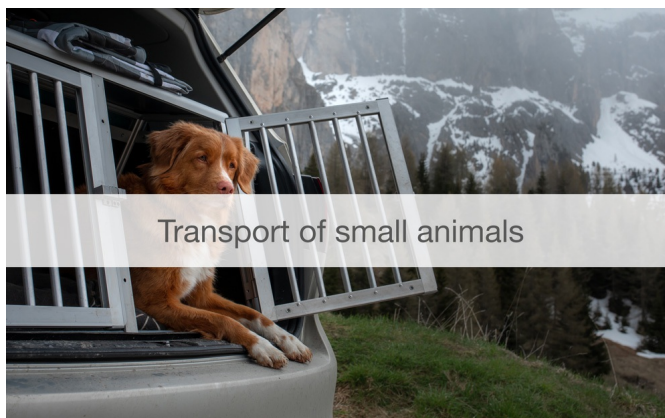

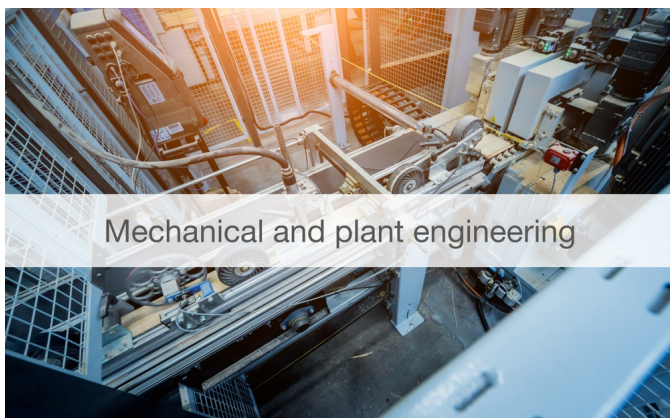

This locking system offers you convenience and reliability

1. Variable: Oblong holes make it possible to use aluminum profiles of different profile widths
2. Flexible: the oblong holes can also be used for adjustment
3. Convenient: A sufficiently large rear grip makes it easy to open the door simply by pulling on the handle, when wearing gloves for example
4. Easy: To close the door slide it shut
5. Secure: Lockable versions are optionally available keyed alike (DIRAK 1333) or keyed different

## 03 Application Areas

Our slam latches for sliding doors provide the perfect solution for a wide range of different applications and offer for high-quality latching solutions in all areas.

**The best solution for every application**
